ABOUT ME

As a highly motivated and detail-oriented professional, I bring a diverse skill set to the table, including project management, communication, and problem-solving abilities. With a track record of success in achieving project goals and exceeding client expectations, I am confident in my ability to deliver results in a timely and efficient manner. I thrive in a collaborative team environment and am always seeking opportunities to learn and grow in my field.

PROJECTS

SMART FISH MONITORING SYSTEM

This project is mainly focus on building an aquarium monitoring system using a single chip computer called **Raspberry Pi Pico**.The major role of this system is to enable users to monitor and maintain their fish aquarium through various parameters such as feeding the fishes on time, checking the water temprature,pH level and water level, changing the water automatically whenever the turbidity level of water reaches a predetermined unsafe point for the fishes.
